Battery Charger

Introduction

Hitachi Hi-Rel Power Electronics Pvt. Ltd. is in the business of Industrial UPS Systems since 1987 and has rich experience in supplying power back-up and power quality solutions for mission critical applications in refineries, petrochemicals, power generation, steel & metals, process industries as well as for critical data processing applications.

Hitachi Hi-Rel Power Electronics Pvt. Ltd. offers high quality power back-up technology and complete customized solutions for demanding applications.

Battery Charger/DC UPS

The Stallion series of advanced battery chargers deploy Thyristor based technology and Digital Signal Processing Control (DSP) to achieve the desired DC output. Power required is adjusted by using phase control technology actuated by the DSP based control card. The DSP based control system enables user-friendly setting via the keypad on the front of the panel.

Stallion series battery chargers are designed for compatibility with all types of batteries-like-VRLA, NiCd, Plante, Lead acid tubular, Gel etc.

HHPE has supplied DC UPS /FC & FCBC charger for Power plant, process plant, hydro carbon industry and offshore projects.

Design Philosophy

Proven Thyristor phase angle DC voltage control. It consists of transformer, semiconductor bridge rectifier, filters & load cut-off circuit.

The AC mains voltage is transformed to a suitable level and fed to the rectifier bridge which rectifies the AC input and feeds controlled DC output to the battery and load, through filter circuit.

Digital Signal Processor (DSP) based control for voltage and current.

Human Interface Module

AC to DC conversion :

The AC to DC Conversion element of the system is typically configured from Thyristor or switch mode technology depending on the performance and size constraints.

The range of Thyristor based systems are highly rugged industrial systems, suitable for the most demanding of environmental and operating conditions. The Thyristorised range of single phase and three phase input charger products capable of operating on 24 V to 360 V DC nominal voltage with output current up to 1200 AMP.

Salient Features

- DSP based Digital control
- LCD Display + Keypad interface
- Comprehensive LED mimic
- Single or Parallel Redundant battery charger
- Auto temperature compensate battery charging
- Three mode of battery charging :
 - Auto float/ boost
 - Manual float / boost
 - Timer based boost
- Independent battery & load current limit
- Wide range of battery charger in standard and customized State of the art design and high quality standards ensure absolute reliability of the equipment
- Battery charger finds usage in mission critical applications like, process control, power station, switchgear protection, telecommunication tec.
- User friendly components layout for easy operation and maintenance date – time stamp event recording - last 999 events logged in non – volatile memory
- Battery charger is suitable with variety of battery types like, SMF, VRLA, LATB, LAPB, & Ultra low maintenance Ni Cd & Fiber plated Ni Cd battery
- Inbuilt Modbus , RS 232, RS 485 communication/ Facility.

Technical Specifications

Advanced Battery Chargers with Thyristor based technology and DSP Control for precise DC output.

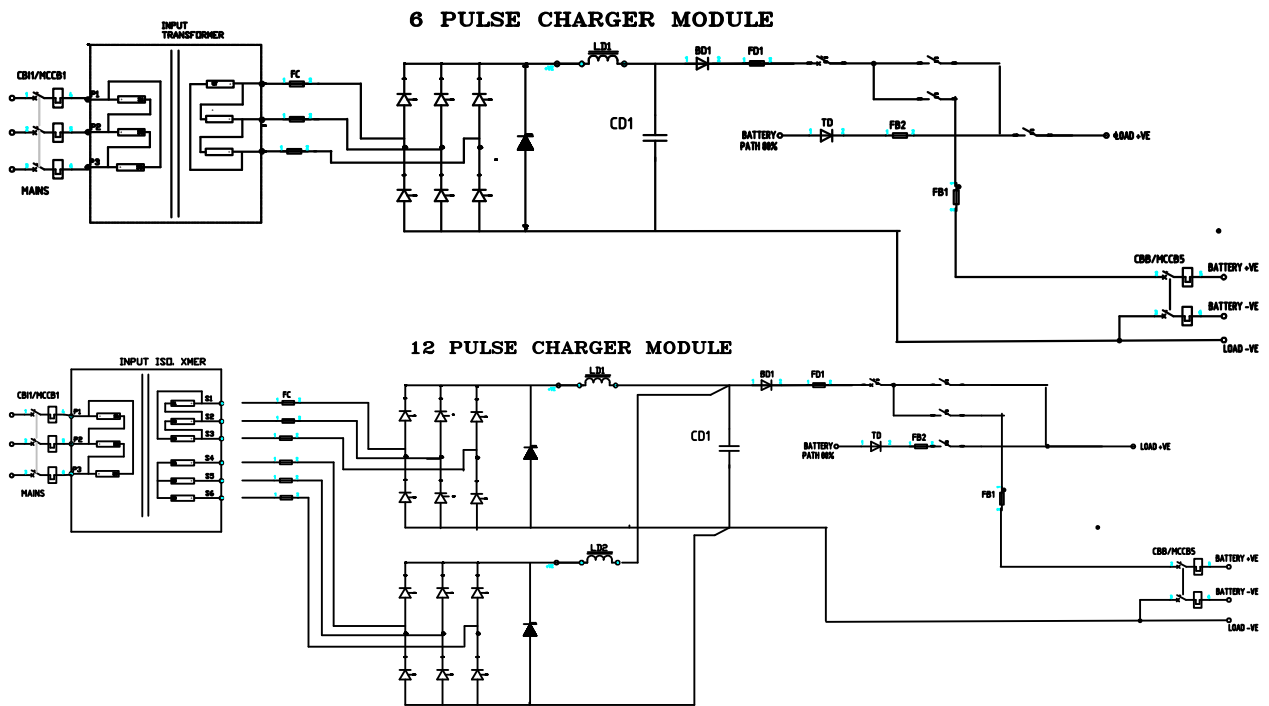

Charger Type	Stallion Battery Charger
Applicable Standard	IEC-62040-3
Charger Characteristics	Constant voltage / constant current with current limit
Control Technology	DSP based digital control, 6-Pulse Charger
Input Voltage	-230 +15% to - 20%, Three phase (Optional : Single Phase Input)*
Input Frequency	50 Hz \pm 10%
Output Voltage	24vDC, 48vDC, 110vDC, 120vDC, 220vDC, 240vDC, 360vDC
Output Current	Up to 1200AMP
Output Voltage Regulation	\pm 1% of set value
Ripple Voltage	\pm 1% RMS with battery connected \pm 2% RMS without battery connected
Protection	Input Switch / MCCB with fuse Output MCB / MCCB Battery fuse / Switch / MCB / MCCB Current limit Soft start Overload protection Reverse polarity protection DC ground fault protection
Meters (On LCD)	Input voltmeter Input current meter Input frequency meter Output voltmeter Battery charging / discharging current meter Load current
Indication	Input ON Charger ON Battery charging Battery discharging Battery Breaker ON
Alarms	Mains Low Mains High Charger Fail DC Low DC High DC earth fault Battery on Float mode Battery on Boost mode Charger over temperature
Operating Ambient Temperature	0 to 45°C
Altitude	1000 Meter from MSL
Atmosphere	Non-corrosive, Dust free, Freely ventilated
Audible Noise @ 1 Meter From Panel Front	55 dBA to 70 dBA (depending on system rating & configuration)
Enclosure Protection	IP-41 (IP-42**)
Type Of Cooling	Natural air cooling or forced air cooling
Paint Shade	RAL-7032, Epoxy powder coated (standard) Other shades on request
Dimensions	On request

*Available up to 8kW output. | ** Optional.

Options

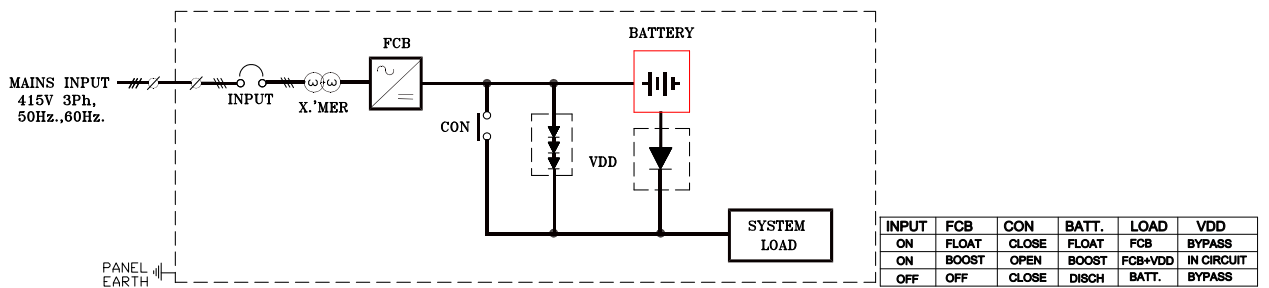

- 12-Pulse Battery Charger
- Different Input Voltages
- Frequency : 60Hz
- RS-485, MODBUS, SNMP
- Paint shade : Other shades on request
- Redundant Cooling Fans
- DC Distribution Board
- Voltage Drop Diode
- 50°C Ambient Temp

Communication Feature

- 2 lines with 16 characters (standard version for English characters) and 12 keys (the function is described for each operating mode) using LCD.
- MCR is a DC UPS Monitoring Software which supports the multiple DC UPS connected in the RS-485 network to the local computer system.
- MCR will automatically search & Monitor the DC UPS devices connected in the network.
- MCR can provide the overview details of all the DC UPS connected in network with the same window provides all information at glance.
- MCR can provide detailed view about all information of the DC UPS such as main's Input, Output, Inverter, Load, Battery data. The information is shown in the same window.
- The functionality of collecting all the information about Alarms occurs in DC UPS and alerting by giving Alarm when it comes. These alarms are came with instant information like their date, time and other properties too.
- With the functionality of data logging (DC UPS metering parameter) MCR provides last 30 days data of each DC UPS.

Event Log

Sr. No.	Date	Time	Event Name
1	12/11/2008	13:16:43	MANUAL BOOST

15	12/11/2008	12:13:21	I/P PHASE OUT
16	12/11/2008	12:12:50	MAINS LOW

Metering Display Information

Main's Input

	Voltage	Current	Frequency
R-Y Phase	385 Volt	40 AMP	49.85 Hz
Y-B Phase	385 Volt	40 AMP	49.85 Hz
B-R Phase	385 Volt	40 AMP	49.85 Hz

Output

DC	Current
220 Volt	1000 AMP

Battery

Current	Status	Mode
0.2 AMP	Charging	Float

Load

In kW	Load(%)
10 kW	10%

Total Load

In kW	Load(%)
12kW	12%

Having Modbus, Profibus, RS 232, RS 485 communication facility to integrate the system with DCS/PLC.

Applications

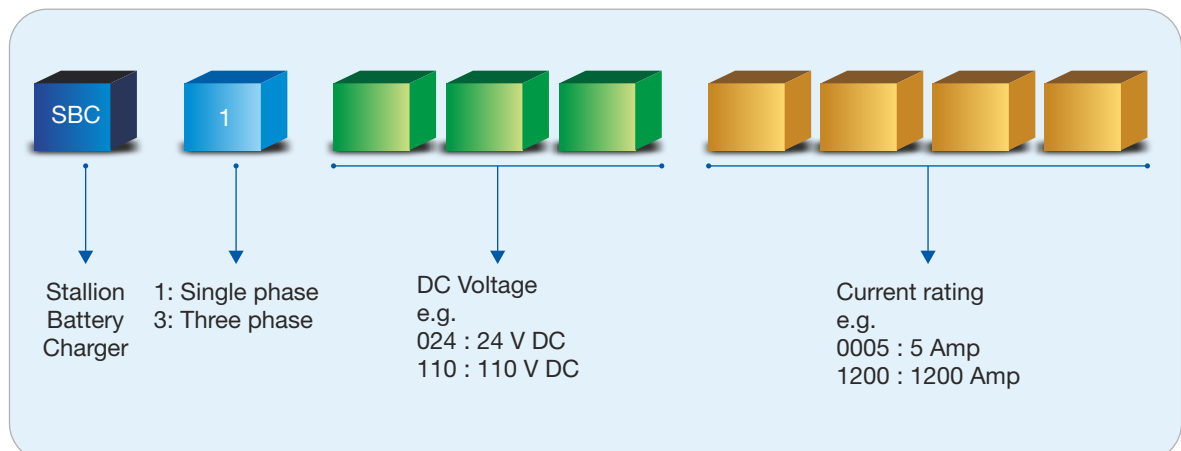

- Telecommunication Systems.
- Power Plant (Generation, Transmission, Distribution).
- Manufacturing Industries.
- Railways.
- Critical DC Requirements.
- Oil & Gas Industries.
- Fertilizer and Petrochemical Industries.

ABOUT US

Founded and established in 1983 as Hi-Rel Electronics Pvt. Ltd., we are now a Hitachi Group company - Hitachi Hi-Rel Power Electronics Pvt. Ltd., recognized as a PIONEER IN POWER ELECTRONICS. With 3 Decades of Experience, we have garnered a significant level of Trust in our Market Segment and continue to offer World Class Power Electronics Products, Value Added Services & Customized Solutions.

- Leading Manufacturer of UPS, Drives & Automation products and Grid Tied Solar Inverter
- State-of-the-Art Manufacturing Facilities at Gandhinagar & Sanand in Gujarat, India
- In-house R&D Facility, recognized by Government of India
- An ISO 9001:2008, ISO 14001:2004 & BS OHSAS 18001:2007 Certified Company, adhering to World Class Quality Standards
- Approved by Major Consultants and EPC Contractors
- Serving Entire Gamut of Industries
- PAN India & Global Presence
- Offer Products with Greater Energy Efficiency & Lower Carbon Footprint
